

CAPOL®

Glazing and anti-sticking agents for the world's confectionery industry

WE MAKE THE WORLD SHINE

CAPOL®

Glazing and anti-sticking agents for the world's confectionery industry

DESCRIPTION

- Glazing and anti-sticking agents for the surface treatment of all kinds of confectionery, including sugar-free confectionery:
 - chocolate (including compound chocolate) dragees
 - soft coated centres, such as jelly beans and jelly eggs
 - hard coated centres, non-pareils and vermicelli
 - gums and jellies based on gelatine, pectin and starch as well as gum arabic pastilles
 - extruded and deposited liquorice products

EFFECTS OF GLAZING AGENTS

- attractive gloss and high stability
- higher resistance to external influences, such as humidity and temperature
- improved colour brightness and depth
- easier flow through processing and packaging

EFFECTS OF ANTI-STICKING AGENTS

- attractive gloss and high stability
- effective separation
- optimal protection against gums sticking together or gums sticking to process and packing machinery
- higher protection of the end product against moisture

APPLICATION

- easy application in:
 - conventional coating and polishing pans
 - coating machinery
 - oiling drums
 - dipping baths
- manual application or application by dosing systems, dripping devices, or spraying equipment

SERVICE

- compliant with national and international food legislation
- Halal and/or Kosher certificates are available for the majority of our products
